Subject: Discover how to Rank Page 1 in Google Maps.

Hi John,

How's it all going? I hope you enjoyed my SEO copywriting guide.

I've been spending a lot of time over the past several months working with local business owners to help them with their marketing and I've also turned it into one of my primary sources of income.

For example, last week I met with a large country club in the town nearby and came up with a marketing strategy to Rank Page 1 in Google Maps, did SEO and helped them to bring in new members.

I generally charge \$1000-2000 a month for these deals and I'm bringing on new ones every month.

Every business owner these days needs help with online marketing. This could be building websites, doing SEO, Facebook ads, building a social media following and ultimately generating more phone calls to help grow their business.

I wanted to share with you an exclusive offer I'm only going to be offering from now till a short period. I hope you know Google maps is the next revolutionary product from Google to get more traffic to your website.

No matter what Business you have whether it's a Country Club, Real Estate Agency, or a Home Business, you can still list your business on Google Maps and get a free local website provided by Google. This helps you to start your business on a zero budget.

70% of smart phone users rely on Google maps to find products or services that can serve their needs. They simply call and send text SMS to the local businesses.

I tried some SEO experiments to test how Google maps work to improve my website ranking. Later I found it as one of my favorite tools for local businesses.

I have created three video lessons that will teach you how to optimize and list your service on Google maps. You will learn how to do the market research using keyword research tools.
