## **The Greatest Business in the World**

Most people don't think about writing for web when they try to think of a great job that could also make them a lot of money, and that's the way many web developers who are making major cash. The money making websites business might not be the biggest business in the world compared to Coca-Cola. But it's quite bigger than as most people think, and there's plenty of money to be made.

I'm a normal guy who never do any business in the past. And I hate all the jobs I did previously.

But this book doesn't teach you to be a normal guy. I'm going to show you how I made \$2500-\$5000 of money a month. For four to five hours of work or less, that's \$50 an hour or more on a good day, and all for creating informative websites and making your family wealthy!

It's a knowledge based and high paying job.

I love this website business. In fact, if I start over today from scratch, I will have just little bit of money in my pocket. Here is why this business is highly lucrative...

- **Anyone can do the business** -No matter what you did in the past, how far you went in school, how old you are. Only thing that you need is a computer with internet connection.
- **You can go at your own pace** - You can work on your own time schedule. This is something you can do whenever you have time to do. You can do if you have few hours after the kids go to bed or one or two hours in daytime.
- **You'll be doing something you love** - This isn't like working for a company. It's about your self-interest. This is something you'll actually do with passion, which means you'll spend more time at it and get more success.
- **You can have a transition to a full-time career** - You can start doing this job after office works and in future have the transition as a full-time career. This means you can say goodbye to the 9-to-5 rat race and make plenty of money from the comfort of your home.
- **You can make a lot of money** - You can earn six figure income, if you make websites on multiple niches at the same time.
- **You can get started without money** - No startup capital is required. You can start today, if you have a laptop with internet access.

## **Write in a Conversational tone**

I promise, you can write a content rich money making website with some little efforts. I've never written even a simple letter before. If I can do this, you also can do this. You no need to be an experienced writer. If you can write an email to your mother that is enough. If you can write in a conversational tone like you talk to your friend in a coffee shop, you can write content for websites. Your word processor has the tools to check spelling as well as grammar.

The money making website business can be started on a shoe string budget. I'll show you how to get started in this lucrative career even you don't have experience.

Now I'm not saying you're going to buy costly software and other tools to get started. A free software, Wordpress is for you to do this business.

The business lets you be your own boss. Unlike almost any other business in the world the money making website business is completely profitable.

You can bring visitors to your website without spending a cent for advertisement. When people type some keywords of your topic in search engines looking for information, your website pops up on the results page. Thousands of visitors will pass

thru your website every day. You can turn your visitors into buyers by adding informative content to your websites.

## **Easy Ways to Get Start The Money Making Website Business**

Most people start with one niche. Depending on whether or not you're going to move on to having many niches, and depending whether you want amazing part time income, or if you want to move up to be a big freelancer, the sky is the limit. You can use the same formula for all the topics.

By repeating this process, you'll have a multiple income stream resulting in great money coming into your bank account each month. You can go as far as you want to take this business.

I have done a website that is based on copywriting. Thousands of people who want to do copywriting business just as much as I do visit my website every day. I loaded it with how-to articles, sales copies writing tips, attractive headline tips, SEO tips, product reviews, etc. that copywriting enthusiasts want.

How would I do today if I had to start over? Well, I am going to share all the information with you in this course. I would be really down if I didn't pocket \$4000 cash on an average month.

That's great part time scratch, and better than many people make in a full time job. During the weekend that means if I l'm going to work roughly 5 hours and make \$1000 on average, that's \$4,000 for one month, cash in my pockets!

That's good profit because the money making website business has great profit margins.

I added PPC ads on my website related to copywriting topics. When someone clicks on the ads and buys something I get paid. The quality information bring visitors every day to my website. You can start many more websites to make more money.

## **How big can the Money Making Website business get for you?**

There's a big market in online advertisements called Google Ad-sense. There are plenty of niches available in the Google ad-program. And there are only few people use the advertisement strategy.

Every year, you can do one or two money making websites. That's a pretty big job. You've got to be prepared for the money making website business and have an additional income resource, if you're going to set up for those, I will show you how to do it.

The money making website business can be as big as you want it to be.

Best of all, you have a high profit business that makes a lot of money. Have better time to spend with your family. Have some fun with your kids, enjoy your experience with your friends. And you really don't need lot of technical skills other than simple writing. I'll teach you how to do it.

## **Why Website Business Is Better Than Other Businesses?**

This is a high return on investment business. It's a low budget business and your return on investment is just crazy. Normally, you can buy a domain for a cheap cost and make use of free software and free marketing tools. That's worst case scenario. I've used social media and various backlink methods to bring free traffic to my website. But most of the time I can tell you the traditional way of doing business will not work anymore.

I'll even show you how building this type of websites is the perfect way for you to take control of finances and your life. One of the other big reasons I love this business is money making websites are sellable for huge profits.

Once you've built your business and established a niche based website you can sell the website for usually 10 to 20 times what you have invested in it.

I'll tell you exactly how you can have multiple income sources in this business. That's another big point. I'll tell you how you can retire early creating monthly pension plan doing this business. My average income exceeds \$2000 a month per niche and I don't think that I'm that expert in website designing.

## **Don't Quite Your Day Job**

Someone only work weekends, some only work after their work, start part time and keep their own jobs. It's really up to you.

There are many businesses that you can set on your own hours but I'll tell you, the money making website business is one of them.

Here are ways to tweak your laptop out for different times of the day depending on when you want to work and I'll show you exactly how. It's easy, in fact...

## **"If You Wake Up in the Morning You Can Make Money in Building Websites, It's Simple"**

The money making website business is an easy way for financial success. It's not more technical and it's not so much complicated and anybody can master it in just a matter of a few hours.

Plus, it's really not hard work. Once you've your area of interest, it takes about 30 or 40 minutes to a design website from a template. After that, you do a little research on the internet to do the write up. It's a pretty interesting job.

Visitors are usually in a really good mood when they read an informative web content, especially if you make the visitor feel good and make a content rich website. You can be a trust worthy writer and have a good time in your business. It's the best way to make more money.

A visitor who buys a product from an internet marketer wants to be cheered up. He wants to make things better and come up in life. And nothing's better than reading a good content from a theme based website for a lot of people. Sometimes it's the highest requirement of their day. That makes everybody much happier.

If you learn how to write some help topics like job interview essays, resumes, health related letters and money making tips, you will get more rewards. It's easy to bring in over six-figure income a year.

The money making website business is applicable for every area of interest you choose. It's a low stress business. I'll tell you how you can write for various niche based websites related to tennis, internet marketing, education, etc.

This business will lead you to eliminate worries about corporate pressures, office politics, no rewards and awards for good performance and etc.

It's a low stress job where you can just have fun and great money. You don't have superiors that you have to listen to. There are no targets you have to meet every month. Here you can enjoy a freedom life.

Best of all...

## **"You Never Have To Worry About The Skills"**

In the money making website business you can use the skills that you've picked up from the jobs you do for others. Website designing, this was a big topic for me. I worked for a while in a job where I learned my web-design business skills and I worked with people that I really like me and help me in many ways to learn the skill.

I had an opportunity to learn everything. I had to have a job; I had a master degree and passion to learn, but not anymore. Now I have my own business and you can too.

Today I have a strict rule to build some theme based websites!

When you start your own money making website business you'll make more money probably, than you're making right now and you get to choose who you work with or nobody at all.

If you just want to build one website based on a niche that's okay and want to do multiple content rich websites using different themes, you can do them. It's up to you. The subjects may be anything else that you have a passion to write in topics like web designing, computer repairing and troubleshooting tips etc.

It's one of the best ways to success in the business. You can choose which subject want to work with. You're in your own track.

I will share with you the secret that brought me up to an extra \$1000 a day of affiliate income from a website that 95% of web designers don't know.

Plus, lastly, the money making website business leads me to make bigger money from forums for exchanging ideas on web designing. For me in the website business, I've had the privilege to work with a lot of freelancers in computer businesses, other ventures.

Instead of picking up a general topic, you can narrow down to a specific one that will bring in high traffic and solid income.

Why?

Sincerely

Gopal Prabakar

P.S. I realize this offer might not be for you. After all, some people wouldn't like to do better things in life, and they feel success in their dreams only. Many people would work for someone else but they never work for themselves.

P.S.S. This letter really is about to make you success and not for anything else. I have everything in my life like a beautiful family, bungalow house and BMW car etc. I'm trying to help you to have this lifestyle, because I'm doing fine.
